## Water & Sewer

Sydney Water is the statutory authority responsible for all sewer mains and water mains and meters within the catchment area of Sydney's greater metropolitan region. An infrastructure network of this significance in terms of its size and the amount of customers who access it requires that qualified professionals are responsible for its maintenance and renewal.

Our Sewer and Water team has three dedicated, Sydney Water accredited, water servicing professionals working full time on Sydney Water asset adjustments and extensions. Application of the service we offer is essential to the successful completion of your development.

Your needs may be as simple as the issue of a Section 73 certificate for your new home or as complex as a complete design servicing a residential precinct. Outside of the Sydney Water catchment area accreditation is not necessary however this does not diminish the fact that the same principles of design, supervision and co-ordination that we offer you apply through all projects. Our close ties with our engineering and surveying teams and accredited plumbers ensures that the product we can provide you complements the project and is delivered in a timely way.

### Sydney Water Requirements:

- Easement creation
- Building approvals
- Mains to meter management
- Section 73 applications
- Adjustment applications
- Organise installation of water meters

### Design Requirements

- Carriers-trunk mains
- Reticulation mains
- Aqueducts
- Deviations
- Adjustments
- Concrete encasements
- Creek crossings
- Building over sewer solutions

### Project Management

- Construction tender and evaluations
- Construction supervision
