Company Capability Statement

Capability

KFW has the capability and capacity to undertake the concept planning, detail planning and engineering detail design work for a broad range of urban development and infrastructure projects.

We have offices in Wollongong and Sydney from which we are able to provide a true professional service to our clients in both the Sydney region, the Illawarra and ACT.

KFW have expertise, backed up by extensive experience in the following:

- Preparation documentation and of Development Applications
- Full civil and structural engineering design for greenfields developments and infill developments
- Sewer and Water design and coordination to Sydney Water Standards
- Detail survey work and preparation of Digital Terrain Models
- Cadastral survey work for Final Plans of Subdivision
- Traffic Engineering, traffic impact reports, traffic management plans
- Managing subdivision plan registrations
- Management and coordination of subdivision certificate applications

Structural Design

KFW has the "in house" capacity to undertake major structural designs under the supervision of an experience registered Structural Engineer in NSW & Queensland.

Our team consists of a Supervision Engineer, 2 qualified Structural Engineers and a team of Structural Drafts people.

Civil Design

KFW has the 'in house' capacity to form three civil design teams with the experience, skills and capacity to work on independent projects or on discrete portions of a larger project.

The composition of our civil design teams is flexible, but is generally two civil designers lead by an experienced professional engineer.

Sewer & Water

Our Accredited Sewer & Water Coordinators have the experience and skill capacity to work concurrently on three sewer and water projects of any size.

We are capable of undertaking the full range of sewer and water coordination tasks from pre design, Sect 73 applications, detail design and approvals, construction supervision, finalising the project and obtaining the Sect 73 Certificate.

KFW has expert knowledge of Sydney Water Growth Servicing Plan and are able to seek funding contributions from Sydney Water. We can deliver considerable infrastructure cost savings to the developer.

Surveying

KFW has the capacity to form four survey parties equipped with state of the art instruments.

Day to day management of the survey parties is undertaken by a Registered Surveyor.
